## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Cosman et al. '922. Cosman et al. disclose a method of controlling an ablation volume depth comprising providing a tissue surface treatment apparatus including a housing (137) having a tissue contacting surface (figure 10), an advancement device (140); positioning the tissue contact surface; advancing at least one electrode; delivering ablative energy; creating an ablation volume and minimizing injury.

Claims 10-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Behl et al. '998. Behl et al. disclose a method of surface treating a target tissue site comprising providing a surface treatment apparatus that includes an expandable member (32) having a deployed and non-deployed state, an energy delivery device with a tissue penetrating distal end (col. 9 lines 9-20), positioning the apparatus at the target site; deploying the expandable member; advancing the at least one electrode, delivering ablative energy, creating an ablation volume and minimizing injury.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3739

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 9 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cosman et al. further in view of Behl et al. Cosman et al. teach all of the limitations of the claims except conforming the contact surface and immobilizing tissue. Behl et al. disclose a similar method and apparatus for its practice. Behl et al. teach that it is old and well known in the art to provide a conforming contact surface thereby immobilizing tissue (col. 3 lines 31-41) to provide a uniform compressive force against tissue and inhibit blood flow to prevent energy losses. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to conform the contact surface and immobilize tissue to in the Cosman et al. method to prevent energy losses.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rosiland S Kearney whose telephone number is 703/3082711. The examiner can normally be reached on Mon.-Fri. 9:00 AM - 6:00 PM.
